Family business in the third generation

75 years of experience in cable and wire manufacturing as well as in temperature measurement technology turned a one-man business into a company with more than 550 employees. We prove our strength every year with more than 1500 special products according to customers' requirements. Each product is a new challenge for our creative technical team. We at SAB see ourselves as a manufacturer and a service provider – in the sense of true partnership and the greatest possible customer orientation.

Today, the quality of our products is known and appreciated in more than 100 countries around the world. In all product ranges, we are certified according to DIN EN ISO 9001. Furthermore, we have implemented an environmental management system for our company according to DIN EN ISO 14001, an occupational health and safety management system according to NLF/ILO-OSH and DIN ISO 45001, and an energy management system according to DIN EN ISO 50001.

And also for the future, our slogan is: "WE GO FORWARD!"

1947 by Peter Bröckskes sen. an independent, medium-sized company.
Peter Bröckskes and Sabine Bröckskes-Wetten
In Viersen (Lower Rhine) 110.000 m ² company site.
Own manufacturing from copper conductor to outer sheath.
VDE approved burnchamber and laboratory within the company.
approx. 430 at the plant in Viersen, 550 worldwide
over 134 Mio. € worldwide
Special Cables
Measurement Technology
Cable Harnessing
Ouality management system acc. to DIN EN ISO 9001 for every manufacturing field Environmental management system acc. to DIN EN ISO 14001 Occupational health and safety management acc. to NLF/ILO-OSH and DIN ISO 45001 Energy management system acc. to DIN EN ISO 50001

Development and production

SAB BRÖCKSKES - your specialist for cables in construction machines

The requirements on construction machines whether road finisher, tunnel or mine vehicles, earth movers or cranes regarding automatic functioning, data networking and electronic drive systems are growing. **SAB** is a competent partner for development and production of cables that make construction machines safer and more efficient. We can trust on already existing products for data and power transmission or design together with our customer tailor made solutions for hybrid cables acc. to his special applications. You can trust on our 75 years of experience in cable construction to create the best connection for you.

Flexible, robust, efficient and appropriate for your individual requirements.

Please contact us directly: info@sab-cable.com

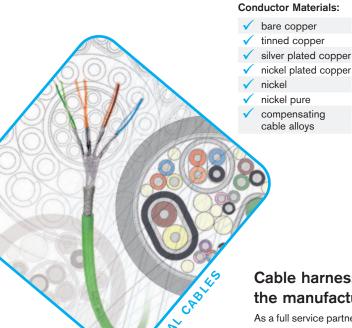

Production possibilities

Flexible cables and wires "Made in Germany"

As a leading manufacturer we develop and produce cables for industrial purposes. Our wide range of materials offers a lot of possibilities for your individual product requirement.

The following survey shows an extract of our production possibilities:

Insulation and Jacketing Materials:

- Polyethylene
- Polypropylene
 - Polyurethane

 - SABIX® (zero halogen)
 - Besilen® Silicone
 - FEP, ETFE, PFA, PTFE
 - PI foil
 - Fibreglass

Temperature Ranges:

Thermoplastic Elastomers

√-50°C up to +145°C

√-50°C up to +220°C

Besilen® - Silicone

√-40°C up to +220°C

FEP, ETFE, PFA

√-90°C up to +260°C

Fibreglass

√up to +600°C

Conductors:

√ cross sections 0,055 - 300 mm²

unshielded and shielded over 100 conductors

Cable harnessing directly from the manufacturer SAB:

As a full service partner we are able to offer besides cable design and production the manufacturing of cable harnessing products according to customer's request. Please trust on our experience for decades in the treatment of cables and connectors.

- cable harness
 - according to customer's demands
- complete cable harness
- UL certified assemblies
- helix cables
 - HV measuring harness

Manufacturer of temperature sensors for industrial applications with 75 years of experience!

- mineral insulated thermocouples
- mineral insulated resistance thermometers
- temperature sensors
- mobile high voltage measuring technology
- temperature sensors for vehicle testing

Product overview

Cable Track Cables

Reeling Cables

Bus and **Ethernet Cables**

ETFE, FEP, PFA Strands

Exploration Line

High Voltage Cables

Special and **Hybrid Cables**

Applications

The S 200 series is the allrounder for demanding environments and permanently flexible applications as for example:

- crane technology
- articulation points
- telescopic boom
- aerial work platforms

Application in spring and motor drums as for example:

- construction lifts
- crane boom
- mobile cranes
- material handlers

CAN Bus, Profibus and Ethernet cables for machine communication as for example:

- advanced driver-assistance systems
- autonomous driving

- monitoring systems
- Wiring strands for high temperature requirements and chemical resistances as for example:
- road paver
- cold milling machines
- earthmoving machines
- + very good temperature resistance
- flexibility at low temperatures
- good electrical insulating characteristics

Outstanding features

+ oil resistant, cross-waterproof

+ unprotected outdoor installation

travel > 10 m is possible

+ high abrasion resistance

small bending radius and small outer diameter

extremely high winding

small cable weight

+ high tensile strength

+ high notch resistance

suitable for cable tracks

+ hybrid cables possible

suitable for mechanical stress

and unwinding strength small outer diameter

suitable for offshore applications

- + very good resistance against solvents
- + very good resistance against chemicals

Control cables

for the unprotected application with high mechanical stress as for example:

- drilling rigs
- pump systems
- compressors

- + UV- resistance
- + ozone resistance
- + saltwater resistance
- + large temperature range
- weather resistant Besilen® (silicone) insulated connection cables
 - flexible at low temperatures
 - + heat registant
 - flame retardant and self-extinguishing
 - typery easy laying
- Cables according to the special requirements of our customers.
 - can be realized for all construction machines

E-Mobility HV test benches

all-electric construction machinery

- suitable construction for different applications acc. to your requirements
- nmong others a combination of data and control elements
- + after sales protection
- marking acc. to customer specification
- tore and sheath colours acc. to customer request
