Applications combined motor connection cables

These flexible motor connection cables are used for the power supply of motors. Depending on the construction type supply and control conductors are possible. The cables are suitable for high mechanical demands in dry, damp and wet conditions as well as at low temperatures.

Exemplary applications:

| | |
|-----------------|---|
| SL 801 C | Highly flexible cable track applications in industries with intelligent servo drives, e.g. automation technologies, machine construction, construction of industrial robots and plants, |
| SL 841 C | motive power, control and manufacturing engineering, in handling systems, car manufacturing industry, |
| SL 871 C | in cable tracks on wood-working centres, colour coding acc. to DESINA® |
| SL 863 C | |
| SL 806 C | Flexible applications in industries with intelligent servo drives, e.g. automation technologies, machine construction, construction of industrial robots and plants, motive power, control and manufacturing engineering, in handling systems, car manufacturing industry, in engineered machining centres, optimised combination of supply and control cores in order to supply energy for drives and their temperature monitor respectively for the brake to stop |
| SL 875 C | All-in-one cable solution with integrated elements for digital signal feedback |

Applications motor feedback and transmission cables

Feedback cables are used for controlling motor speed and for giving feedback values. Transmission cables produce transmit control pulses for positioning and procedure characteristics, e.g. connection of speedo, brake and pulse generators.

Exemplary applications:

| | |
|-----------------|--|
| SL 802 C | Highly flexible, mobile connection cables for e.g. speedo, brake, temperature control in motors, |
| SL 803 C | for continuously flexible applications in automation technology, control and production engineering, |
| SL 839 C | in cable tracks on wood-working machines, machine and industrial plant construction, even with high |
| SL 842 C | mechanical demands and in dry, damp and wet conditions, as well as at low temperatures flexible |
| SL 843 C | connection cables e.g. for speedo, brake, temperature control in motors, for continuously flexible |
| SL 807 C | applications in automation technology, control and product engineering |
| SL 808 C | |

Applications motor connection cables for DNC* motors 0.6/1 kV

These cables are suitable for the fixed installation and flexible use e.g. in machine and industrial plant construction with average mechanical demand in dry, damp and wet conditions.

Exemplary applications:

| | |
|-----------------|--|
| SL 810 | Automation technology, control and product engineering, machine and industrial plant construction, |

SAB Servo cables are particularly applicable on Siemens and Bosch Rexroth drives and controls.

Servo Motor Cables

Applications

■ DESINA® - DistributEd and Standardized INstAllation technology

DESINA® is an extensive concept for standardizing and distributing fluid and electric installations of machines and plants. A co-operation of machine construction, car manufacturing and supply industries has, furthermore, set up the specification of necessary components.

DESINA® applies already existing solutions such as open bus systems, industrial standards for connectors, etc. By standardizing components, interfaces and connecting systems, e.g. an optical fibre copper hybrid cable, most varying systems can be realised on a physical basis.

The following sheath colours are defined as a function code:
